

QUALITY POLICY

From its beginnings, Talleres Dizmar is dedicated to the elaboration and erection of metallic structures. The Company has the aim of fabrication and service provision with high quality level, ensuring that they meet customer requirements and that the Company benefits from the added value created within the development of its relationship.

The quality of product and service, the environment and the security of our workers, is an objective shared by the entire organization and it is under the responsibility of Management. Our customers, when choosing us, can therefore count on us to find a reliable response from the first contact till the end of service provision.

The Company has 8 key principles on which its philosophy, its politics and its Integrated Management System are based:

1. CUSTOMER APPROACH
2. LEADERSHIP
3. INVOLVEMENT OF COMPANY STAFF
4. PROCESS-BASED APPROACH
5. CONTINUOUS IMPROVEMENT
6. MUTUAL BENEFIT RELATIONSHIP WITH THE SUPPLIER
7. COMMITMENT WITH THE ENVIRONMENT
8. COMMITMENT WITH WORKERS' SAFETY AND HEALTH

Talleres Dizmar is also directly involved in the effort of achieving compatibility between the economic development, environmental protection and the occupational safety, with the aim of providing future generations with a prosperous and healthy environment. The implementation of this sustainability concept to our activity involves the compliance of applicable requirements: legal, statutory (applicable certification standards EN, ISO, CSA and NHSS), and others engaged by the Company regarding Occupational Risks Prevention and Environment, together with short and middle term - target setting for minimizing environmental impacts and occupational risks during service provision.

For that purpose, Talleres Dizmar has the commitment to use prevention techniques in all potentially polluting activities that ensure the protection of the environment and the preservation of natural resources, by adapting to environmental changes in order to preserve their effectiveness, as well as the commitment to use techniques to prevent all existing occupational risks in order to contribute to the welfare of workers.

The aim of our Company Quality Policy is the consolidation of this vision by means of continuous improvement of our customer service and attention to their requirements, within environmental and occupational security practice. We firmly believe that these are key factors to develop an adequate business management and ensuring by this way the continuity and future competitiveness of our business.
